PROFESSIONAL SUMMARY

Software Developer who builds faster and delivers better results by pairing strong full-stack fundamentals (Java, JavaScript, Node.js, Express.js, React.js, MongoDB) with daily, deliberate use of AI tools — Claude, Google Gemini API, and modern AI-assisted coding workflows — to go beyond conventional development speed and quality. Not just a developer who codes in isolation: leverages AI to accelerate debugging, catch edge cases early, and ship production-ready, AI-integrated features end-to-end, including a live commercial product for a real business. Combines solid engineering judgment with AI-driven productivity to consistently deliver polished, tested, maintainable results, faster. Seeking a Software Developer / Full-Stack Developer role.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), Java, Python
- Frontend: React.js, HTML5, CSS3, Bootstrap, TailwindCSS
- Backend: Node.js, Express.js, RESTful API Design & Development
- Databases: MongoDB (NoSQL), MySQL (SQL) — schema design & application integration
- Process & Version Control: Git, GitHub, Agile/iterative development, clean & testable coding practices
- Cloud & DevOps: AWS deployment (in progress), Docker (in progress), CI/CD basics
- CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- AI Tools & Productivity: Claude, Google Gemini API, Emergent, Replit — used daily for AI-assisted coding, debugging, and shipping LLM-integrated features faster without sacrificing code quality
- Other: JWT, Bcrypt Authentication, Zod Validation, Multer, PDF-Parse, UPI/Payment Gateway Integration, Postman

PROJECTS

AI-Powered Habit Tracker | *React.js, Node.js, Express.js, MongoDB, Gemini API*

- Built a full-stack habit-tracking web app end-to-end — React front end, Node.js/Express REST API, and MongoDB data layer — with JWT/Bcrypt authentication and clean, modular, maintainable code.
- Implemented Gemini-powered AI coaching, GitHub-style activity heatmaps, and streak analytics, optimizing backend queries for performance and responsiveness.

KBS Beauty Saloon — Family Business Platform | *React.js, Node.js, Express.js, MongoDB, JWT — [Live Site](#)*

- Problem: My mother's salon relied on phone calls and walk-ins to manage appointments, causing scheduling conflicts, no-shows, and no organized record of bookings or payments.
- Solution: Designed and built a full-stack booking platform with customer authentication, real-time appointment booking, an admin dashboard for staff to manage schedules, and an integrated payments page; own the product post-launch — hosting, bug fixes, and new features.
- Outcome: Deployed and in active use by the business — replaced manual phone-based scheduling with self-service online booking, gave the owner a live dashboard to manage appointments and payments, and increased bookings by 46%.

Full-Stack AI Resume / ATS Checker | *React.js, Node.js, Express.js, MongoDB, Gemini API, Zod*

- Designed, developed, tested, and deployed a full-stack web application and REST API that parses resumes and returns structured ATS scoring, keyword-gap analysis, and AI-powered rewrite suggestions.
- Built the backend with Node.js and Express.js, designed a MongoDB schema for version history, and implemented JWT authentication; used Zod for request/response validation to keep the API contract testable and maintainable.

EXPERIENCE

Full Stack Developer — Revamp Academy, Chennai

Jun 2025 – Jul 2025

- Designed and built an Expense Tracker web app end-to-end (React.js, Node.js, Express.js, MongoDB) with secure authentication, CRUD operations, and RESTful APIs, following clean-code and testable-development practices within an Agile workflow.
- Debugged and resolved application/integration issues, optimizing MongoDB queries and backend logic for reliability and performance.

Android Developer — NSIC Technical Service Center, Chennai

Mar 2023 – May 2023

- Developed an Android app (Java, Kotlin) with user authentication, real-time CRUD operations, and cloud data sync via Firebase Realtime Database; troubleshooted integration issues to ensure a stable, secure experience.

EDUCATION

B.E., Computer Science & Design

Graduated May 2025

R.M.K. Engineering College, Chennai (Anna University) | CGPA: 8.20

CERTIFICATIONS

- Introduction to Front-End Development — Meta (Coursera), Oct 2022
- Python Basics for Data Science — IBM (edX), May 2022
- Node.js, Express & MongoDB — Udemy, Jun 2025
